

SW1000

The motorized SW1000 pedestrian gate is a slim, cylindrical panel gate that provides single direction or bi-directional access control. The gate is an ideal product to provide disabled or delivery access in conjunction with our waist high or optical turnstiles.

The SW1000 has a powerful brushless DC motor that opens and closes the barrier smoothly. Opening / closing speed, as well as the length of time the gate stays open before closing, is adjustable. The gate has a fire safety input and a number of safety features, including impact sensing, and an adjustable breakaway force.

The gate integrates with any access control system. It can also be activated by push button.

Corporate logos can be etched on the panel. The gate has a brushed chrome finish similar in appearance to satin stainless steel. Custom plated and powder coated finishes can be provided to match decors.

COMMON APPLICATIONS

- Employee/Visitor Access Control
- Wheelchair/Disabled Access Control
- Bulky Item Delivery

Why Alvarado?

Alvarado is the leading manufacturer of pedestrian gates. Since its founding in 1956, Alvarado equipment has been installed in thousands of locations throughout the world.

Our superior product quality, integration expertise and industry leading service and support are just a few reasons that many of the world's most respected companies use our products again and again.

KEY POINTS

Motorized	Smooth opening and closing; adjustable operating speed.
Wide Passage Area	36" opening width; two gates can operate in tandem to double the passage area.
Opening Direction	Left hand, right hand or bi-directional operation.
Operation and Systems Integration	Integrates with access systems; can also be activated by push button.
Safety Features	Fire safety input opens gate automatically; impact sensing; adjustable breakaway force.
Optional Panel Etching	Barrier can be etched with customer logo or graphic.

AVAILABLE MODELS

- SW1000 - Single gate
- SW1000T - Tandem gate set

OPTIONS

A number of product options and optional finishes are available.

COMPLEMENTARY PRODUCTS

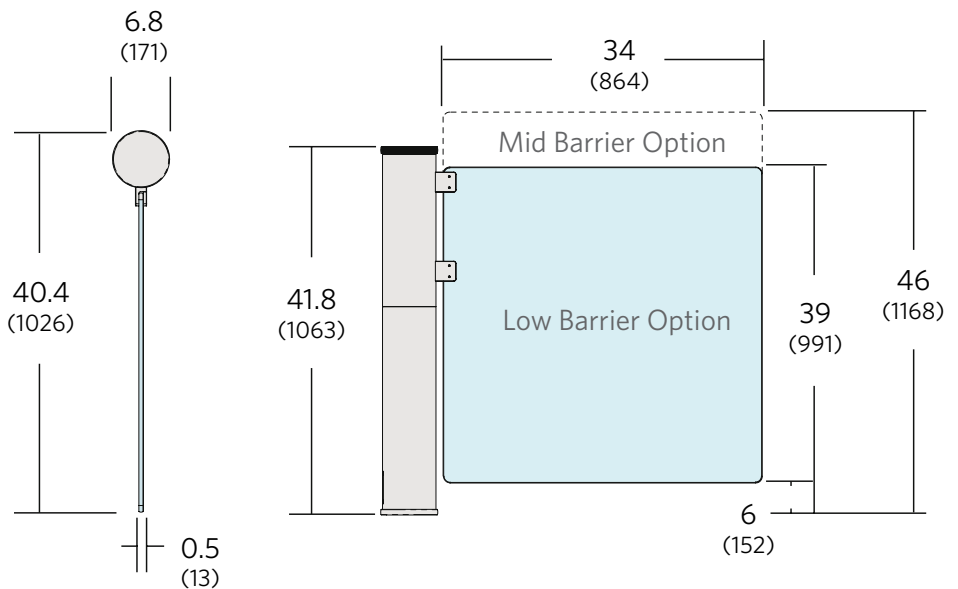

Railing or custom barriers can be used to fill in open areas, direct users and are ideal companions to the SW1000.

RESOURCES

Alvarado's knowledgeable staff understands that many customers do not deal with pedestrian gates on a regular basis. We offer assistance and technical expertise to ensure the best solution is selected for your facility.
